

Suma Alu

Suma Alu L10 is a liquid mechanical ware washing detergent for medium hard water, safe on aluminium

Description

Suma Alu L10 is a concentrated liquid mechanical ware washing detergent specially formulated to provide excellent soil removal in medium hard water conditions and to be safe on aluminium.

Key properties

Suma Alu L10 is a pale yellow liquid detergent specially formulated for use in a wide range of single and multi-tank ware washing and pot washing machines. The product is intended primarily for use in soft to medium hard water conditions. It contains a blend of alkalis and powerful scale control agent for effective removal of soil. The formulation also contains corrosion inhibitors which makes it suitable for use on the soft metallic surface such as aluminium and silver.

Benefits

- Safe for use on aluminium
- Cuts through grease and dried-on food
- Suitable for use in medium to hard water conditions
- Being highly concentrated gives greater economy in use

Use instructions

Suma Alu L10 is normally applied using JohnsonDiversey automatic dispensing equipment. It can however be used in conjunction with integral dosing pumps where fitted. To ensure perfect cleaning results in soft to medium hard water conditions, dose at a concentration of 2 - 5 g/litre, depending on local site conditions.

At 2 g/litre, this will prevent scale deposits in water containing up to 85 ppm CaCO_3 .

At first use, rinse pump and transport tubes of the dosing system to avoid possible crystallisation in these tubes caused by mixing of products.

Technical data

Appearance	clear yellow liquid
pH neat	13.5
pH (1% solution)	12.0
Relative density	1.25

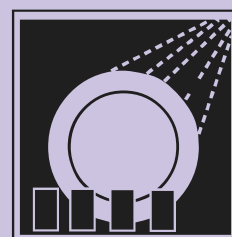

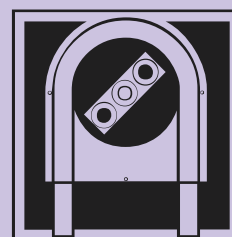

These figures are typical values and should not be interpreted as specifications.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Store in original container. Avoid extremes of temperature.
