controls

Provide adequate ventilation.

Eye/face protectionEyewear complying with an approved standard should be worn if a risk assessment indicates<br/>eye contact is possible. Unless the assessment indicates a higher degree of protection is<br/>required, the following protection should be worn: Tight-fitting safety glasses. Personal<br/>protective equipment that provides appropriate eye and face protection should be worn.

Hand protectionChemical-resistant, impervious gloves complying with an approved standard should be worn if<br/>a risk assessment indicates skin contact is possible. It is recommended that gloves are made<br/>of the following material: Polyvinyl chloride (PVC). Rubber (natural, latex). To protect hands<br/>from chemicals, wear gloves that are proven to be impervious to the chemical and resist<br/>degradation. A break through time of >60 minutes is suggested. Gloves should be inspected<br/>regularly for damage.

Other skin and bodyWear appropriate clothing to prevent repeated or prolonged skin contact. Use appropriate skinprotectioncream to prevent drying of skin.

Hygiene measuresGood personal hygiene procedures should be implemented. Wash hands and any other<br/>contaminated areas of the body with soap and water before leaving the work site. Use<br/>appropriate skin cream to prevent drying of skin.

Respiratory protectionRespiratory protection not required.Environmental exposureAvoid releasing into the environment.

#### **SECTION 9: Physical and chemical properties**

9.1. Information on basic physical and chemical properties		
Appearance	Viscous liquid.	
Colour	Yellow. Clear.	
Odour	Citrus. Chlorine.	
Odour threshold	Not applicable.	
рН	pH (concentrated solution): approx 12.7	
Flash point	This product does not sustain combustion.	

Relative density	1.070 typically @ 20°C		
Solubility(ies)	Soluble in water.		
Viscosity	300-450 cP @ 20°C		
Explosive properties	There are no chemical groups present in the product that are associated with explosive properties.		
Explosive under the influence of a flame	Not considered to be explosive.		
Oxidising properties	There are no chemical groups present in the product that are associated with oxidising properties.		
Comments	Information given is applicable to the product as supplied.		
9.2. Other information			
Other information	Not relevant.		
SECTION 10: Stability and rea	activity		
10.1. Reactivity			
Reactivity	The reactivity data for this product will be typical of those for the following class of materials: Acids. Alkalis. Oxidising materials.		
10.2. Chemical stability			
Stability	Decomposes over time. Factors that increase the rate of decomposition: increase in temperature, certain metallic impurities, high initial concentration, fall in pH below 11and exposure to light.		
10.3. Possibility of hazardous reactions			
10.3. Possibility of hazardous	Teactions
